

Foundations in Cancer Care

Sylfeini mewn Gofal Canser

Academi Oncoleg Felindre
Velindre Oncology Academy

Gwasanaeth Canser Felindre / Velindre Cancer Service

Course Overview

This comprehensive course offers learners an introduction to cancer care, providing an understanding of how cancer impacts individuals throughout their journey with the disease and beyond. It is structured to follow the cancer care pathway, encompassing key stages from prevention and diagnosis to treatment, survivorship, advanced disease, and end-of-life care.

2 Days

Why complete this course?

This course equips participants with knowledge and insights to better understand and contribute to cancer care, whether they are healthcare professionals or individuals seeking to expand their understanding.

Who should complete this course?

This course is designed for individuals across a range of roles and settings, aiming to enhance their understanding of cancer care. It caters to both registered healthcare professionals and unregistered workforce members involved in supporting people affected by cancer. Additionally, it is ideal for those working in other environments who wish to broaden their knowledge of cancer care practices.

Course Delivery Method

This course will be delivered as an interactive workshop. Our workshops involve a variety of activities, including case studies, group discussions, polls and role play.

You will be able to attend the course virtually or in person.

CPD

This course will contribute towards your CPD hours/points.
